ANT ON RAIL  ANT O	Refeatifithe Soft
	Sp. Elifer
There is a ant on your balcony. It wants to leave the rail so sometimes it moves right and sometimes it moves left up	MRATE
There is a ant on your balcony. It wants to leave the rail so sometimes it moves right and sometimes it moves left u	until it gets
exhausted.Given an integer array A of size N which consists of integer 1 and -1 only representing ant's moves.	i <sub>K</sub>
Where 1 means ant moved unit distance towards the right side and -1 means it moved unit distance towards the less is to find and return the integer value representing how many times the ant reaches back to original starting position	eft .Your task
is to find and return the integer value representing how many times the ant reaches back to original starting position	on.
Note:	<i>€</i> ~
Assume 1-based indexing     Assume that the railing extends infinitely on the either sides	Æ.
	steentet
Input Format:	\$
input1 : An integer value N representing the number of moves made by the ant. input2 : An integer array A consisting of the ant's moves towards either side	Rec
input2 : An integer array A consisting of the ant's moves towards either side	30 TEMPS
